

Structure of CORVOS, detailing secondments.

ESRs (orange balls, AT1, AT2, ...), move from one FM (AT, DE, ...) to another FM, affiliated to a university, which awards a Double European PhD Degree (for 6M), and also to a research or industrial partner (houses) for re-search and training purposes (6M plus 1M, resp.; as indicated by continuous arrows) or for training purposes only (1M, interrupted arrows). All ESRs take a training secondment at the hospitals (1M), as indicated in the coloured upper box. NL, FR and DK means the administrative beneficiary and the local university which awards the degree, but is not involved in exchanges. RCB is both Research Inst. and Hospital.
